PROFESSIONAL SUMMARY

Systems support technical graduate and Systems Engineering student building personal and academic applications with React, TypeScript, Next.js and C#/.NET. My latest project, Recorta, integrates local AI for image editing. Three years of academic practice in Java and .NET, with additional training in Spring Boot and REST APIs.

SELECTED PERSONAL AND ACADEMIC PROJECTS

Recorta | Local AI image editor | 2026

React, TypeScript, Transformers.js, ONNX Runtime Web, Tauri, Vitest
https://github.com/JuanEstebanHerreraH/Recorta

- Integrated pretrained BiRefNet and U²-Net models for background removal without uploading images; offline use after model download.
- Implemented three hardware tiers using WebGPU or CPU/WebAssembly, with two Web Workers separating inference and image processing from the interface.
- Added non-destructive masks, reversible history, batch processing and PNG, WebP and JPG export with size and DPI controls.

Café Almacén | Coffee traceability and inventory | 2026

Next.js, TypeScript, Supabase, PostgreSQL
https://github.com/JuanEstebanHerreraH/Sistema_Trazabilidad_Cafetero

- Connected producers, farms, lots, processing, warehouses, stock movements, customers and sales for coffee traceability.
- Added statistics and user and role management to organize business records.

FileWatch | Windows file versioning | 2026

C#, .NET 8 WPF, Rust, SQLite
https://github.com/JuanEstebanHerreraH/FileWatch

- Built compressed snapshots, version history, restore and export workflows.
- Separated the interface and core using Named Pipes and stored metadata in SQLite.

SKILLS

Development: React, TypeScript, JavaScript, Next.js, C#, .NET, Rust and Tauri.

AI and quality: Pretrained model integration, Transformers.js, ONNX Runtime Web, WebGPU, WebAssembly, Web Workers and Vitest in Recorta.

Data and tools: SQL, PostgreSQL, SQLite, Supabase, Git, GitHub, Docker and Vercel; Java and Spring Boot training.

EDUCATION

Corporación Unificada Nacional de Educación Superior CUN

Técnico Profesional en Soporte de Sistemas e Informática | Graduated February 26, 2026

Systems Engineering in progress since 2023 | 10-semester program with three qualifications

Technology-level cycle in progress | Qualification expected in 2027

ADDITIONAL TRAINING AND LANGUAGES

Java, Spring Boot and REST APIs | Oracle Next Education / Alura Latam | 2025-2026

Spanish: native | English: A2 (elementary)
